## Achievements

So far in my career, with direct and indirect help of many of my peers, I have:

- Failed. A lot
- Built a low latency prediction service and toolset which drastically improved the *data-science to a/b test* time and provided real-time quality monitoring so that scientists could iterate on their model parameters more quickly
- Sold (internally, to a leadership team), managed and developed a project that delivered a significantly faster, cheaper and more flexible Search+Rank+Store service that brought great operational benefits and unlocked several product ideas
- Been part of, led and helped grow into a full-fledged organization a multi-disciplinary team applying machine learning and personalization techniques to optimize conversion of an e-commerce website
- Automated my job first full-time job away (and let my boss know!)

## Work History

- Senior Software Developer, Booking.com. Amsterdam, Netherlands. Apr 2012 - Apr 2017
- Software Engineer, IBM. Remote. Jan 2010 - Oct 2011
- Intern, IBM. Hortolandia, SP, Brazil. Aug 2008 - Jan 2010
- Intern, Motorola Mobility. Jaguariuna, SP, Brazil. Dec 2007 - Jul 2008

## Education

- B.Sc. Computer Science, University of Campinas (Unicamp). 2006 - 2011
  - Participated and completed Google Summer of Code 2009
  - Real-time embedded systems research scholarship. 2006, 2007
